

Every student in grades 7-12 must have a concussion baseline (ImPACT) testing done before they can participate in any JH/HS sport. The athletes need the baseline test completed every two years. This is a computerized test that is completed, most often is scheduled when students are doing their athletic physical. The clinic will either email or mail you the documentation that this test has been completed. Please turn in this completion confirmation. If you had this done last year, then you do not need it again until next year. For example, if you had it done your freshman year, then you will need to do it your junior year, etc.
